

Hi Dominic,

On behalf of DJI, please find below our response to Mr. Mark Dummett's letter:-

"DJI makes products entirely for peaceful purposes, and we deplore any use of our products to cause harm. Drone technology has created great benefits for society, and the vast majority of our users are responsible drone operators. However, our products are freely available from market sources and we cannot control how they are used, nor do we monitor how customers use them because that would be a violation of our customers' privacy."

If used anywhere publicly, this should be attributed to a DJI Spokesperson.

All the best,

M@
